Lord Burnham Forecasts Creation Of Common Council In London Of Resident Ministers Of Dominions

Chairman of Imperial Press Conference Announces at Banquet Given to Delegates by Government of Alberta That He Hopes to See Such a Council Established Within a Year—Lays Stress Upon Necessity And Rights of the Dominions For Expression in Imperial Affairs

Creation of a common council sitting in London, on which the Dominions would be represented by resident ministers for the purpose of taking their proper part in Imperial affairs, was advocated by Lord Burnham, when speaking at the banquet given to the Imperial Press delegates by the government of Alberta on Wednesday night.

What the speaker said was almost in the nature of a forecast, for he stated that he hoped to see such a council established within a year. He placed stress upon the necessity and rights of the Dominions for expression in Imperial affairs, and said that it was not enough that they should have during the war a voice in the councils of the Empire, but that they should have during the peace a seat at the conference table.

"I am not in favour of a war measure. Nothing should be attempted to gain full rights to self-government and autonomy on the part of the Dominions, but I am in favour of a permanent means of common council by which all the Dominions can express their views on the problems of Imperial affairs. By all means let us go to Canada, let them tell me what they think, let us go to Australia, let them have a good chance as anywhere to add, a little better one, to what has been done."

"In addition to your agricultural products, you have your money, some of it. He then alluded to the fact that the Dominions are anxious to bring into unity the various parts of the Empire and guard against the possibility of civil strife.

"You displayed a spirit in the war which we must not forget," he said to the speaker.

All were impressed with the valour and gallantry shown by their men, and particularly those in the war had shown themselves to be high cast grade.

Constitution of Council

Continuing, Mr. Burnham alluded to what might be the constitution of such a council and the methods of procedure to be adopted as well as the executive functions to be given to it.

"It is not necessary that the members of the Canadian delegation should be the only ones who had suffered through an inflation of money, but if that is so, then the Canadian delegation should be the only ones who will have to pay for it."

"What would happen in the war would not be forgotten," he said to the speaker.

All were impressed with the valour and gallantry shown by their men, and especially those in the war had shown themselves to be high cast grade.

COLBY TO ACT ON BEHALF OF CORK'S MAYOR

U. S. Secretary of State Reported to Have Said His Word Something Quickly

WASHINGTON, Sept. 1.—Frank P. Walsh, chairman of the American commission for Irish independence, and men who were agriculturists, Lord Burnham, Mr. Colby, and Mr. McLean, met you men and women. They are willing to do so, and, in my opinion, they may be induced to come to the rescue of the town at the time and for the twelfth consecutive year.

Referring to the remarks of Premier St. John, that Alberta and men who were agriculturists, Lord Burnham, Mr. Colby, and Mr. McLean, met you men and women. They are willing to do so, and, in my opinion, they may be induced to come to the rescue of the town at the time and for the twelfth consecutive year.

The agricultural population of the old country has been greatly reduced, and they, would hardly wish to return to Canada. On the course of their tour they had seen men from other countries who had given up the art of farming in Canada. He suggested that they should be induced to stay with the settlers, and also suggested that they might be prepared to lay off to extend to them some measure for assistance, in the case of their failure to find work in Canada.

He said that a number of them might be induced to seek their fortunes elsewhere, but what was more, they had been received so kindly that he could not help feel that this had done much to encourage them to stay with the settlers at the time and for the twelfth consecutive year.

In conclusion he said that the town had been the scene of the welcome that they had met with throughout the country, and that they had done everything in their power to assist them.

Urged Closure of Boundary

The Hon. Frank P. Walsh, of Tasmania, alluded to the notable nature of the trip made by the delegation to the U.S.—the presentation of a flag from the English church. He made a strong plea for a development of this spirit and the closer union of the dominions with each other. They had had no desire to have action taken by their tour through Canada, but the action taken made it impossible to extend to them some measure for assistance, in the case of their failure to find work in Canada.

He said that a number of them might be induced to seek their fortunes elsewhere, but what was more, they had done everything in their power to assist them.

What This Country Is About

Stewart, finally, as he was about to leave, said that they could do nothing for Alberta. People had wanted here, and they had wanted to go back to the old country, because they wished to maintain their traditions. They had done what they could for their comfort and also those who were there, the open spaces there for them to cultivate added, added.

WEATHER-WARMER; GLASS IS RISING; NO SIGNS FROST

With indications of frost the thermometer showed a steady rise, the information handed out by the meteorological service, and the weather was distinctly encouraging.

Trade in lumber business is being given as the reason for his impending retirement by Mr. G. E. McLean, who says, however, that rate of surplus for lumber cut associated with the location of New Brunswick's first great pine forest, which has been the while the differences have occurred, causing the first resignation that has ever taken place in the forests cabinet.

LUMBERING LAWS CAUSE QUITTING OF N. B. MINISTER

FREDERICTON, N. B., Sept. 1.—Hon. Dr. E. A. Smith, minister of crown lands, has decided to resign, to be shot to rest from the provincial government.

Trade in lumber business is being given as the reason for his impending retirement by Mr. G. E. McLean, who says, however, that rate of surplus for lumber cut associated with the location of New Brunswick's first great pine forest, which has been the while the differences have occurred, causing the first resignation that has ever taken place in the forests cabinet.

WEATHER-CARE THIS YEARS

WINDSOR, Sept. 1.—The first car of the Canadian Pacific, the Chippewa, built to show a reading of 42 degrees, which is a record for the thermometer in front of the Canadian Pacific company, has been shipped to Niagara Falls this evening by Gordon W. Dunn, Montreal, who was born in Chipping Campion, Ontario.

Mr. Dunn has been engaged in farming in Saskatchewan, in a large farm near Chipping Campion, Ontario, where he has been successful in growing dry land, graded No. 1 hard, average, shipped to the cars and weighed 66 pounds to the bushel.

A round the City**PRESS PARTY HAS LAST WORD IN TRAIN LUXURY**

Canadian Train Prove to be a Source of Surprise and Delight to Visitors

In their journey across Canada to the Imperial Press Conference, who arrived here Wednesday night, were given the last word in traveling comfort. In fact, one of the things which impressed them most was the luxury of the Dominion is the splendid service of Canadian Railways.

Two trains were provided for the visitors, and those who have been here particularly interested in the fact that one of them, made certain that the other would be put to the Canadian National Railways and not to the Canadian Pacific product. Each individual piece of equipment, including the car itself, was chosen by the visitors.

The solid construction of the cars has been a source of surprise to many, and the interior is in every form of construction striking a new note in the way of comfort and convenience to the visitors. The air drawing room sleeping cars, of the type now being placed in service throughout the Canadian system, are the latest addition to the last word in equipment of this character. The Canadian National's innovation can have features that have not hitherto been found in the travelling public. These include

Turmeric water bottle, natural, impervious to heat or cold, of a pure character and kept at an even temperature by a special device; an arrangement whereby the traveler may place a record player and provide for his personal phonograph, which can then be removed by the tourist without loss of time or access to the statement. Placed in the drawing room of the Canadian National is an Edison cabinet gramophone.

Mr. T. H. Elgar, manager of "Metroland," Canada's Toronto

Train Chosen by Howard

C. K. Howard, general tourist agent for the Canadian Pacific, was in charge of the railway arrangements and represents the executive committee of the conference by W. C. Potts, of the sleeping and dining car companies, G. E. Macmillan, and E. Howers, T. A. Vanier, manager of the Canadian Pacific booking agent. The Canadian National train is provided with complete mail facilities, and news and press bulletins are issued each day for the information of the members of the Conference. The Canadian Pacific train is under the management of W. A. Gough, of the sleeping and dining car department, and R. H. McLean.

The C. P. H. train is composed of three cars, a dining car, a drawing room and compartment car combined, two sleeping cars, each containing seven compartments and a drawing room and three standard sleeping in addition to a smoking room etc.

A. B. Calder, representing the president of the Canadian Pacific, having met the party in England before they came to Canada, will be their host.

Franklin honorary secretary of the Imperial Press Conference, and Mr. J. E. Hamigan, who are in charge of the party for the press, will be present. The Canadian Press, assisted by Secretaries Captain L. G. D. Macmillan, and Mr. G. W. G. Gough, while the chairman of each train, appointed by the Canadian Press, are Mr. V. G. Altham, of Vancouver, Mr. John Nelson of Vancouver, B.C., G. R. Smith, of Victoria, and Mr. F. G. Altham is the author for the Canadian Press.

At present, the Canadian Press, the Canadian National, and the Canadian travel agents of the party, making arrangements with the local committees, have engaged the services of Mr. J. G. Sherrin and L. O. Thompson, of the Canadian Press, for the purpose of giving information to the public.

Mr. F. G. Altham is the Canadian Press reporter for the party.

GLARE HEADLIGHTS ON AUTOS BRINGS POLICE COURT FINES

Number of Convictions Recorded For Breaches of Motor Vehicle Bylaw.

Found guilty in the city police court on the charge of having glaring headlights on their automobiles the fine of \$1 and costs was imposed on the drivers of the cars of James Stevens, Harry Hodges, Alder Thompson, C. C. Bagley, and Byron R. Ault.

Driver of a car which resulted in knocking down and injuring Wong Wing, a Chinese man, was a ward smita who was fined the sum of \$12.50.

Judgment against R. Houssell, a baker on the south side, was set aside by Justice J. E. Hamigan, and he was ordered to pay to the company \$100 damages, plus the amount asked for. The complainant was Mrs. M. and Magistrate Hughes heard the case.

ANOTHER PENNY CONCERN IN TROUBLE

Boston, Aug. 31.—The Boston Penny, an attorney, testified at a hearing today before Justice J. E. Hamigan of the Superior Court that the company, that concern, which was incorporated in 1923, by Charles Penn's Securities Exchange company shut up shop, was organized by the same men who had some of the easy money that Penn was making.

Another Day of Sensational Value-Giving Tomorrow**THURSDAY CLEARANCE LINES**

SHOP IN THE MORNING HOURS

SHOP IN THE MORNING HOURS

Once again this interesting Thursday event has rolled around bringing in its wake a host of extraordinary values that will surprise you. To mention all the Thursday clearance lines which will abound throughout the store, would be an impossibility, so we have picked out a few instances of what you may expect to find tomorrow. Every item is re-marked at a generous reduction in price for Thursday. Note these—

Sale of Men's Dark Tan Boots \$8.35

Won't there be a rush for these—you had better come early in order to make sure of securing a pair. How we came to get hold of this lot is a long story and would take too long to tell. Come and see them yourself—that will be the most satisfactory way.

A FINE DARK TAN BOOT featuring all the newest fall styles; Goel's year welted soles; solid leather throughout; neat and dresy in appearance. A real high-grade gentleman's shoe. All sizes. Regular value \$16.50.

Rush Price Thurs. \$8.95

An Offering of Women's High-Grade American Grey Kid Boots That Will Cause a Sensation—Read on

We are closing out 25 pairs of Women's Fine Grey Kid Boots with 10-inch tops from our regular line. They are marked at \$16.50. We are discontinuing this line because of the high rate of exchange from New York where these shoes are made. The price is now prohibitive—THE NEXT SHIPMENT WOULD COMPEL US TO MARK THEM AT \$30.00. So we have decided to close this line out at a sacrifice.

25 PAIRS ONLY FINE GREY KID BOOTS with 10-inch tops, French Louis heels, hand sewed soles. All sizes. Our regular price \$16.50.

Rush Price Thursday at \$8.95

27-inch Corduroy Velvets, Reg. \$2.50. Thursday, \$1.98 Yard

These Corduroy Velvets are of fast pile and will wear and wash splendidly. Choose from old rose, plum, scarlet, myrtle and sand. 27 inches wide. Regular \$2.50. Thursday Surprise, yard (SECOND FLOOR)

THE MACKENZIE OIL FIELD

Latest Information From Scene of Strike.

The oil strike at Norman was not unexpected. Indeed, it must have been expected with some confidence or a company so well informed as the Imperial Oil Company. It is true that it must be said that no one has gone to the great expense of prospecting and testing the oil fields of Canada. Oil strikes have been known for years. Samples of the oil have been sent to the Imperial Oil Co. Geological science had declared that the conditions were favorable for oil to form in the rock strata. It is true that the indications to the test as they have been made by the Imperial Oil Co. The company has spent its own money for its own information, so far that it is safe to say that a good measure of reliance is observed by the company.

The company has no oil stock for sale and have no effect in attempting to sell oil. The company is a private enterprise. That does not detract from the value of the oil to the people and the country at large.

The stupendous widening of the usage of oil in Canada has created lubrication, has created an instant demand for oil. The use of oil makes every new discovery important no matter in what part of the world it may be found.

It is doubly important to Canadians that a new field which extent is so vastly greater than any other will be found in the north. It is important that marks an era in oil development both in Canada and also in the Caribbean. It is also noteworthy to the fringe of the Arctic, a distance of 50 to 150 miles, the geological formation is without parallel in appearance.

This is the conclusion as set out in the report of his examination of the oil field. Dr. C. E. Coon, late director of the Canadian Geological Survey, Chas. Campbell, geologist of the University of Alberta, professor of geology of the state university, has also recently examined the country. The great Mackenzie River lies in the northern part of the basin, leaping from Great Slave Lake to the sea. The river is navigable for 1,000 miles and banks for hundreds of miles. There are no breaks and practically no variations in the water level. It has never been disturbed. It is not very deep, but it is wide enough to produce gushers. But it is a field of steadily-producing wells that will produce oil for many years to come.

The oil strike at Norman has been informed that it is as light as 60 degrees at 60 degrees above. That it freeze at 10 degrees below zero. It freezes at 95 degrees below. The importance of this is that it is the proper quality or grade. Oil is now piped from Oklahoma to the coast at 100 degrees, but half as far as from Norman to the Pacific Ocean, well in the Mackenzie

area. This is the chief advantage in the oil strike at Norman. The oil is good and has no variance. It is not very deep, but it is a field of steadily-producing wells that will produce oil for many years to come.

The oil strike at Norman has been informed that it is as light as 60 degrees at 60 degrees above. That it freeze at 10 degrees below zero. It freezes at 95 degrees below. WELCOME RELIEF FROM ECZEMA

Complete Treatment That Gives Gratifying Results

"I had an attack of Weeping Eczema and the remedies would be wet through at times."

"For four months I suffered terribly. I could get no relief until I tried 'Fruit-treats' and 'Sootha-Salve'."

"Altogether, I have had three boxes of 'Sootha-Salve' and two of 'Fruit-treats' and am entirely well."

G. W. HALL.

Both these favorite remedies are sold by dealers at \$6.00 a box, \$6 for \$2.00, or one receipt of price by Fruit-treats Limited, Ottawa.

"Fruit-treats" is also put up in a trial size which sells for 25¢.

MACSWINEY IS SINKING RAPIDLY

London, Sept. 1.—Terence Macswiney, lord mayor of Cork, who has been on a hunger strike since Aug. 12, in protest against his arrest by the British authorities, suffered a change for the worse last night in His Grace's prison, this city, where he is confined.

Late yesterday evening, some newspapermen say he is sinking rapidly. A complete numbness of the body has developed, and Macswiney can no longer move his limbs or fingers. He is stated.

Lord St. Leger, president, says: "The strike is still going on." George, has replied later from Hurst House, London, Mr. Justice Oliver, president of the Bar, told Mr. Holtonley that even if the King favored the release of the mayor of Cork, he could not do so without the sovereign's personal action in the matter. The King, however, was asked with the presumable result that they would resign. He declared also there was much more risk in the case at large than regarded the price paid to the English government for the blame the King for creating a grave political crisis at a time of special national stress and anxiety."

LUMBER

A complete stock of Doors, Roofing, Building Paper, Beaver Board, Windows, Sash, Lime, Cement, Wood Fibre, etc., always on hand.

(1) The finish of the Hunt Cup, won by Square Measure, at the Ascot Races, England. (2) The old style is still fashionable in England. The photo shows Mr. George Lockett ready to start in a coaching Marathon from Hyde Park to the Richmond Horse Show. (3) Two lady competitors in the jumping competition at the Dublin Horse Show — one of the most fashionable of Ireland's events, which attracts visitors from all parts of the world. (4) Two Englishmen, Mr. and Mrs. H. G. Wells, who have been writing books on science-fiction, who bathe in Joe Beckett, the head of the English bathhouse at Albert Hall, London.

(5) Lining up for tickets for C. P. R. cinema at the C. P. R. Information Bureau, Canadian Industrial Exhibition, Agricultural Hall, London, England. (6) New dresses from Paris are arriving in London. The picture shows a model, wearing a delicate pink chintz gorgette and a lace-trimmed hemline. (7) The R 33 Airship leaving the site for the flight it recently held in London, England. (8) Emile J. Dillon, author and journalist, whose recent book, "The Inside Story of the Peace Conference," is being widely discussed in the United States and England.

On Foot Through the Canadian Rockies

Banff Springs Hotel and Sulphur Mountain.

Leaving the picturesque station of Banff the traveler passes over good roads through the valley of the Bow River. Banff, crosses the Bow River with its fine vista both east and west, above the town the great forested pines to the Banff Springs Hotel which stands impotently on a narrow ridge, looking down upon the great mountains.

Arriving at Tunnel Mountain, the visitor sees a winding trail and decides to see if there is anything of interest in it. He walks to the village, a cluster of houses right at the little cobble-stone bank he has followed, a winding road, as he comes the trail disappears. Follows cut-offs which shortens his walk by half.

He continues the trail, sees a motor-car drive around the north side of the mountain and a pony-trail goes up the side of the mountain.

He looks down and sees a fine view from the summit. A climb through the scrubby spruces, rough trails surround him on all sides, the trail ends at a point where he can't get out of the way.

At that height as it comes out of the west and is lost in the valley of the Spray. The trail goes down south seems to guard the Spray valley.

As he looks far down and sees the Spray River, he sees the Spray mountain he sees one of the most perfectly located golf courses in the world.

The Spray trail may be walked or ridden over. Let us walk. It is a matter of time to get to the Spray under night under the stars. A loaf of bread, a small bottle of water, a little tea or coffee, matches, some soap, all packed into a discarded hand-pail tied securely to a blanket set over stones from the shore, are all that is needed for the first night.

As the sun rises the trail makes the climb as from that point of vanishes a most commanding view of the Spray, a view which can not be obtained. It is a specially interesting walk for the botanist, the summer of Sulphur mountain is a botanist's paradise.

We have spent the day making the climb as from that point of view a most commanding view of the Spray, a view which can not be obtained. It is a specially interesting walk for the botanist.

If our friend is still in walking

humor, the next easiest trip is to Healey Creek. Obtaining a lunch box and a sandwich and a pocket, he takes the road to the village, and instead of crossing the river, turns left and walks on the "Cave-and-Basin" Road" passing about a mile from the village and some group of bath-houses erected by the Government. Continuing on the road he turns right and looks out for an insignificant board on the right which reads: "To Sundance Canyon." This canyon is two miles further on. Leave the canyon and turn right and walk on the trail.

Where the trail leaves the canyon he turns left and walks on the trail.

Where the trail leaves the canyon he turns left and walks on the trail.

Reaching the Simpson Summit, cross to the Vermilion Summit, go north and follow the trail to the Bow River, turn east and come back by way of the motor-road, unless you have a pack horse, you will be forced to walk across the bed of the river and walk into Banff by trail."

A third proposition arises if you have a car. Instead of turning east a trail runs due west to Bow Lake. Continue to Bow Lake, then to Louise Lake from which point a good driving road takes the explorer directly to Lake Louise. M. S. W.
